|---|--------------|-----|-----------|--|--------------|
| Grade: Five   | Subject: Mat | :hs | Term: 1st |  | Time: 40mins |
| Teacher's Name: Week: 3 Day: 1  |              |     |           |  | :1           |
| Unit 1: Whole Numbers and<br>OperationsTopic: Multiplication of Numbers up to 5<br>digits |              |     |           |  | pers up to 5 |

**Student Learning Outcomes:** 

- Multiply numbers up to 5 digits by a number up to 3 digit numbers.
- Solve real-life situations involving operations of multiplication.

Resource Material:

Chalk/Marker, White/Blackboard, Maths Textbook, 2 baskets, Number cards, Worksheet

Warm-up Activities:

Before beginning the lesson, ask students to say "Tasmiyah".

Ask students: How are you? Encourage them to say, "Alhamdulillah".

Write two 2-digits and two 3-digits numbers on the board. Solve it with the help of students by asking them to raise their hands and tell the steps for solving it. Then ask them "multiplicand, multiplier and product"?

5mins

20 mins

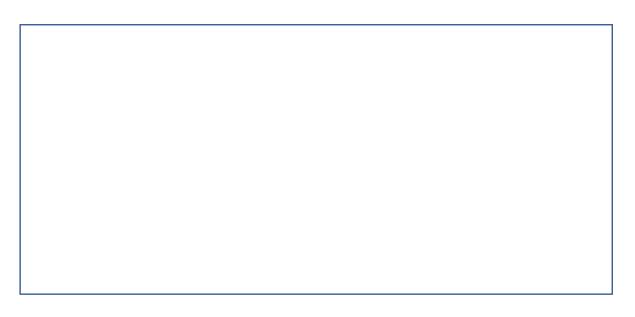

Teaching and Learning Activities:

- Tell students today they are going to multiply 5-digit by 3-digit numbers.
- Explain the rules to multiply two numbers, split the number by which we multiply a number in expanded form.
- Then multiply each digit of the number by each value separately. Finally add the results.
- Put two baskets on the table. One basket will have multiple 5 digit number cards and the other basket will have 3 digit number cards.
- Call students one by one and ask them to pick one card from each basket randomly and multiply them step by step on the board. The remaining students will check if he/she is solving it correctly or not. Repeat this activity with all students.

| Review:   | 3mins  |
|---|--------|
| Recall the lesson by explaining the terms related to multiplication.  |        |
| Evaluation:   | 10mins |
| Assess students understanding by giving them 3-digit and 5-digit numb | pers.  |
| Homework:   | 2mins  |
| Solve the given worksheet at home.                                    |        |

|                       | Workshe        | et  |

Explain<br>d of multip<br>orm.<br>nd the othe<br>rizontal bo<br>n the giver<br>7000 | er number<br>oxes with<br>boxes.<br>200         | 22 n<br>ng box ma<br>nultiplica<br>about th<br>er vertica<br>n the nur<br>70 | ethod.<br>ation<br>ne<br>lly in a<br>nber in<br>2 |

**Step IV:** Add all the products. This sum will be the product of 7272 and 258.

1400000 + 40000 + 14000 + 400 + 350000 + 10000 + 3500 + 100+ 56000+1600 + 560 + 16 = 1876176.

So, 7272 x 258 = 1876176

Ask them to open their textbooks at page 7 and solve the given example of box method of multiplication of two numbers in their notebooks. Encourage students to ask questions.

| Grade: Five                     | Subject: Mat | ths    | Term: 1st       |       | Time: 40mins   |
| Teacher's Name:                 |              | Week   | : 3             | Da    | ay: 5          |
| Unit 1: Whole Nur<br>Operations | nbers and    | Topic: | Division of Nun | nbers | up to 5-digits |
| Student Learning                | Outcomes:    |        |                 |       |                |

- Divide numbers up to 5 digits by a number up to 2 digits.
- Solve real-life situations involving operations of division.

Resource Material:

Chalk/Marker, White/Blackboard, Maths Textbook pages 9 and 11, Division clue words wallchart

Warm-up Activities:

Before beginning the lesson, ask students to say "Tasmiyah".

Ask students: How are you? Encourage them to say, "Alhamdulillah".

Ask them to write a division sum in their notebooks and label its associated division terms.

Teaching and Learning Activities:

20 mins

5mins

- Have students open page 14 of their textbooks.
- Read the statement of the given example. Explain the statement of the example. Refer to the clue words by simply writing them on the board.
- Tell them that here the total amount and the number of employees are given and we need to find the amount got by each employee. For this, we need to divide 86734 by 12.
- Tell them that the division steps are the same as we did in the previous grade, just be careful with the digits.
- Solve the example on the board by explaining each step. Take the first digit of the dividend then divide it by the divisor and write the answer on top as the quotient. Subtract the result from the digit and write the difference below. Bring down the next number (if present).
- Repeat the same process until all digits are done and the remainder is less than the divisor or zero.
- Encourage them to ask questions.

## Review:

3mins

Sum up the lesson by explaining the terms related to division. Tell them to always divide the numbers going from left to right.

| Evaluation:   | 10mins      |
|---|-------------|
| Ask students to solve Q4 (i-iii) of Exercise 1.3.                 |             |
| Write any one 5-digit number and one 2-digit number on the board. | Ask them to |
| solve it in their notebooks.                                      |             |
| Appreciate them for their correct answers.                        |             |
| Homework:   | 2mins       |
| Solve Q4 (iv-ix) of Exercise 1.3 in notebooks.                    |             |
